GUIDE MASTER

HYDRAULIC VALVE GUIDE PRESS GM-600

GM 600 Guide Master is developed for valve guide replacement. With GM 600, this work is fast and safe. The risk for damage on cylinder heads and valve guides are minimized.

Separate hydraulic measuring system gives correct reading of actual force at any moment.

Two hand control makes the operator work safe.

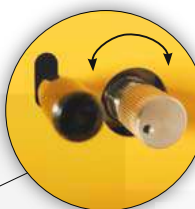

Tool drawer with standard set of tools.

Adjustable height of the machine.

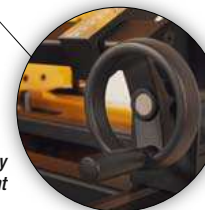

Press force adjustable during operation, from 0 to 6 tons.

Working lights, 24 volts.

Easily adjustable fixture for fast positioning of the cylinder head.

Handwheel for easy angle adjustment

VALVE GUIDE REPLACEMENT

Tool for removal of valve guide with lifter bore protection.

Valve guide installation tool with press-in deep adjustment.

Specifications:

Movement (press head)

Horizontal: 675 mm
Vertical: 170 mm
Piston movement: 260 mm

Mesurments

Width: 1050 mm
Height: 1700 mm
Depth: 890 mm
Weight: 370 kg

Hydraulik

Working pressure: 210 bar
Pressforce: 0-6 ton

Electric connection 400V, 3ph, 50 Hz
Effect: 1,6 kw
Control voltage : 24 V
