

Dowel Puller: **How to use**

1. Hammer
2. Rod
3. Sleeve
4. Collet
5. Insert Collet
6. Opener

- A. Put a suitable insert collet on the dowel. Place the complete tool over the insert collet
- B. Hit the sleeve with the hammer until the collet together with the insert collet will grip the dowel sufficiently

- C. Hit with the hammer upwards until the dowel gets loose.
- D. Attach the opener and hit the hammer until the dowel falls out.
